Google Trends 12 Month Moving Average

The New York Times @nytimes · Jul 16
IBM's Watson was supposed to transform industries and generate riches for the company. Neither has panned out. Today, it stands out as a sobering example of the pitfalls of hype and hubris around AI.

What Ever Happened to IBM's Watson?
IBM's artificial intelligence was supposed to transform industries and generate riches for the company. Neither has panned out. Now, IB...

MIT Technology Review @techreview · Jul 18
Artificial intelligence is already creating real harm, just not in the ways most people would expect. The good news is the fight back has begun.

The true dangers of AI are closer than we think
Forget superintelligent AI: algorithms are already creating real harm. The good news: the fight back has begun.

The best resource for building a career in data science (IMHO)

PART 1: GETTING STARTED WITH DATA SCIENCE

- 1 WHAT IS DATA SCIENCE? ▶
- 2 DATA SCIENCE COMPANIES ▶
- 3 GETTING THE SKILLS ▶
- 4 BUILDING A PORTFOLIO ▶

PART 2: FINDING YOUR DATA SCIENCE JOB

- 5 THE SEARCH: IDENTIFYING THE RIGHT JOB FOR YOU ▶
- 6 THE APPLICATION: RÉSUMÉS AND COVER LETTERS ▶
- 7 THE INTERVIEW: WHAT TO EXPECT AND HOW TO HANDLE IT ▶
- 8 THE OFFER: KNOWING WHAT TO ACCEPT ▶

PART 3: SETTLING INTO DATA SCIENCE

- 9 THE FIRST MONTHS ON THE JOB ▶
- 10 MAKING AN EFFECTIVE ANALYSIS ▶
- 11 DEPLOYING A MODEL INTO PRODUCTION ▶
- 12 WORKING WITH STAKEHOLDERS ▶

PART 4: GROWING IN YOUR DATA SCIENCE ROLE

- 13 WHEN YOUR DATA SCIENCE PROJECT FAILS ▶
- 14 JOINING THE DATA SCIENCE COMMUNITY ▶
- 15 LEAVING YOUR JOB GRACEFULLY ▶
- 16 MOVING UP THE LADDER ▶

BUILD A CAREER IN Data Science

What is Data Science?

Job Paths

Can anyone become a data scientist?

Three important trends in data science

- Data science has moved through the early stages of the hype cycle
 - There is an oversupply of new data scientists
 - Shift in the way data science titles are distributed
- 
- Job market for junior data scientists is very competitive/crowded.
 - May be applying for jobs not truly reflective of data science

Vicki Boykis @vboykis

Acquiring data science skills

bit.ly/ryan-datascience-unc

How to get the skills

- Earning a graduate degree in data science or a related field
- Participating in a data science bootcamp (e.g., 8-15 week crash course)
- Doing data science work in your current job
- Teaching yourself thru online courses and data science books

What is the most important skill for a data scientist?

Advice to aspiring data scientists: start a blog

Last week I shared a thought on Twitter:

David Robinson (@drob) When you've written the same code 3 times, write a function
When you've given the same in-person advice 3 times, write a blog post
9:22 PM · Nov 8, 2017
4.2K 46 Copy link to Tweet
Tweet your reply

Ironically, this tweet hints at a piece of advice I've given at least 3 *dozen* times, but haven't yet written a post about. I've given this advice to almost every aspiring data scientist who asked me what they should do to find a job: **start a blog, and write about data science.**¹

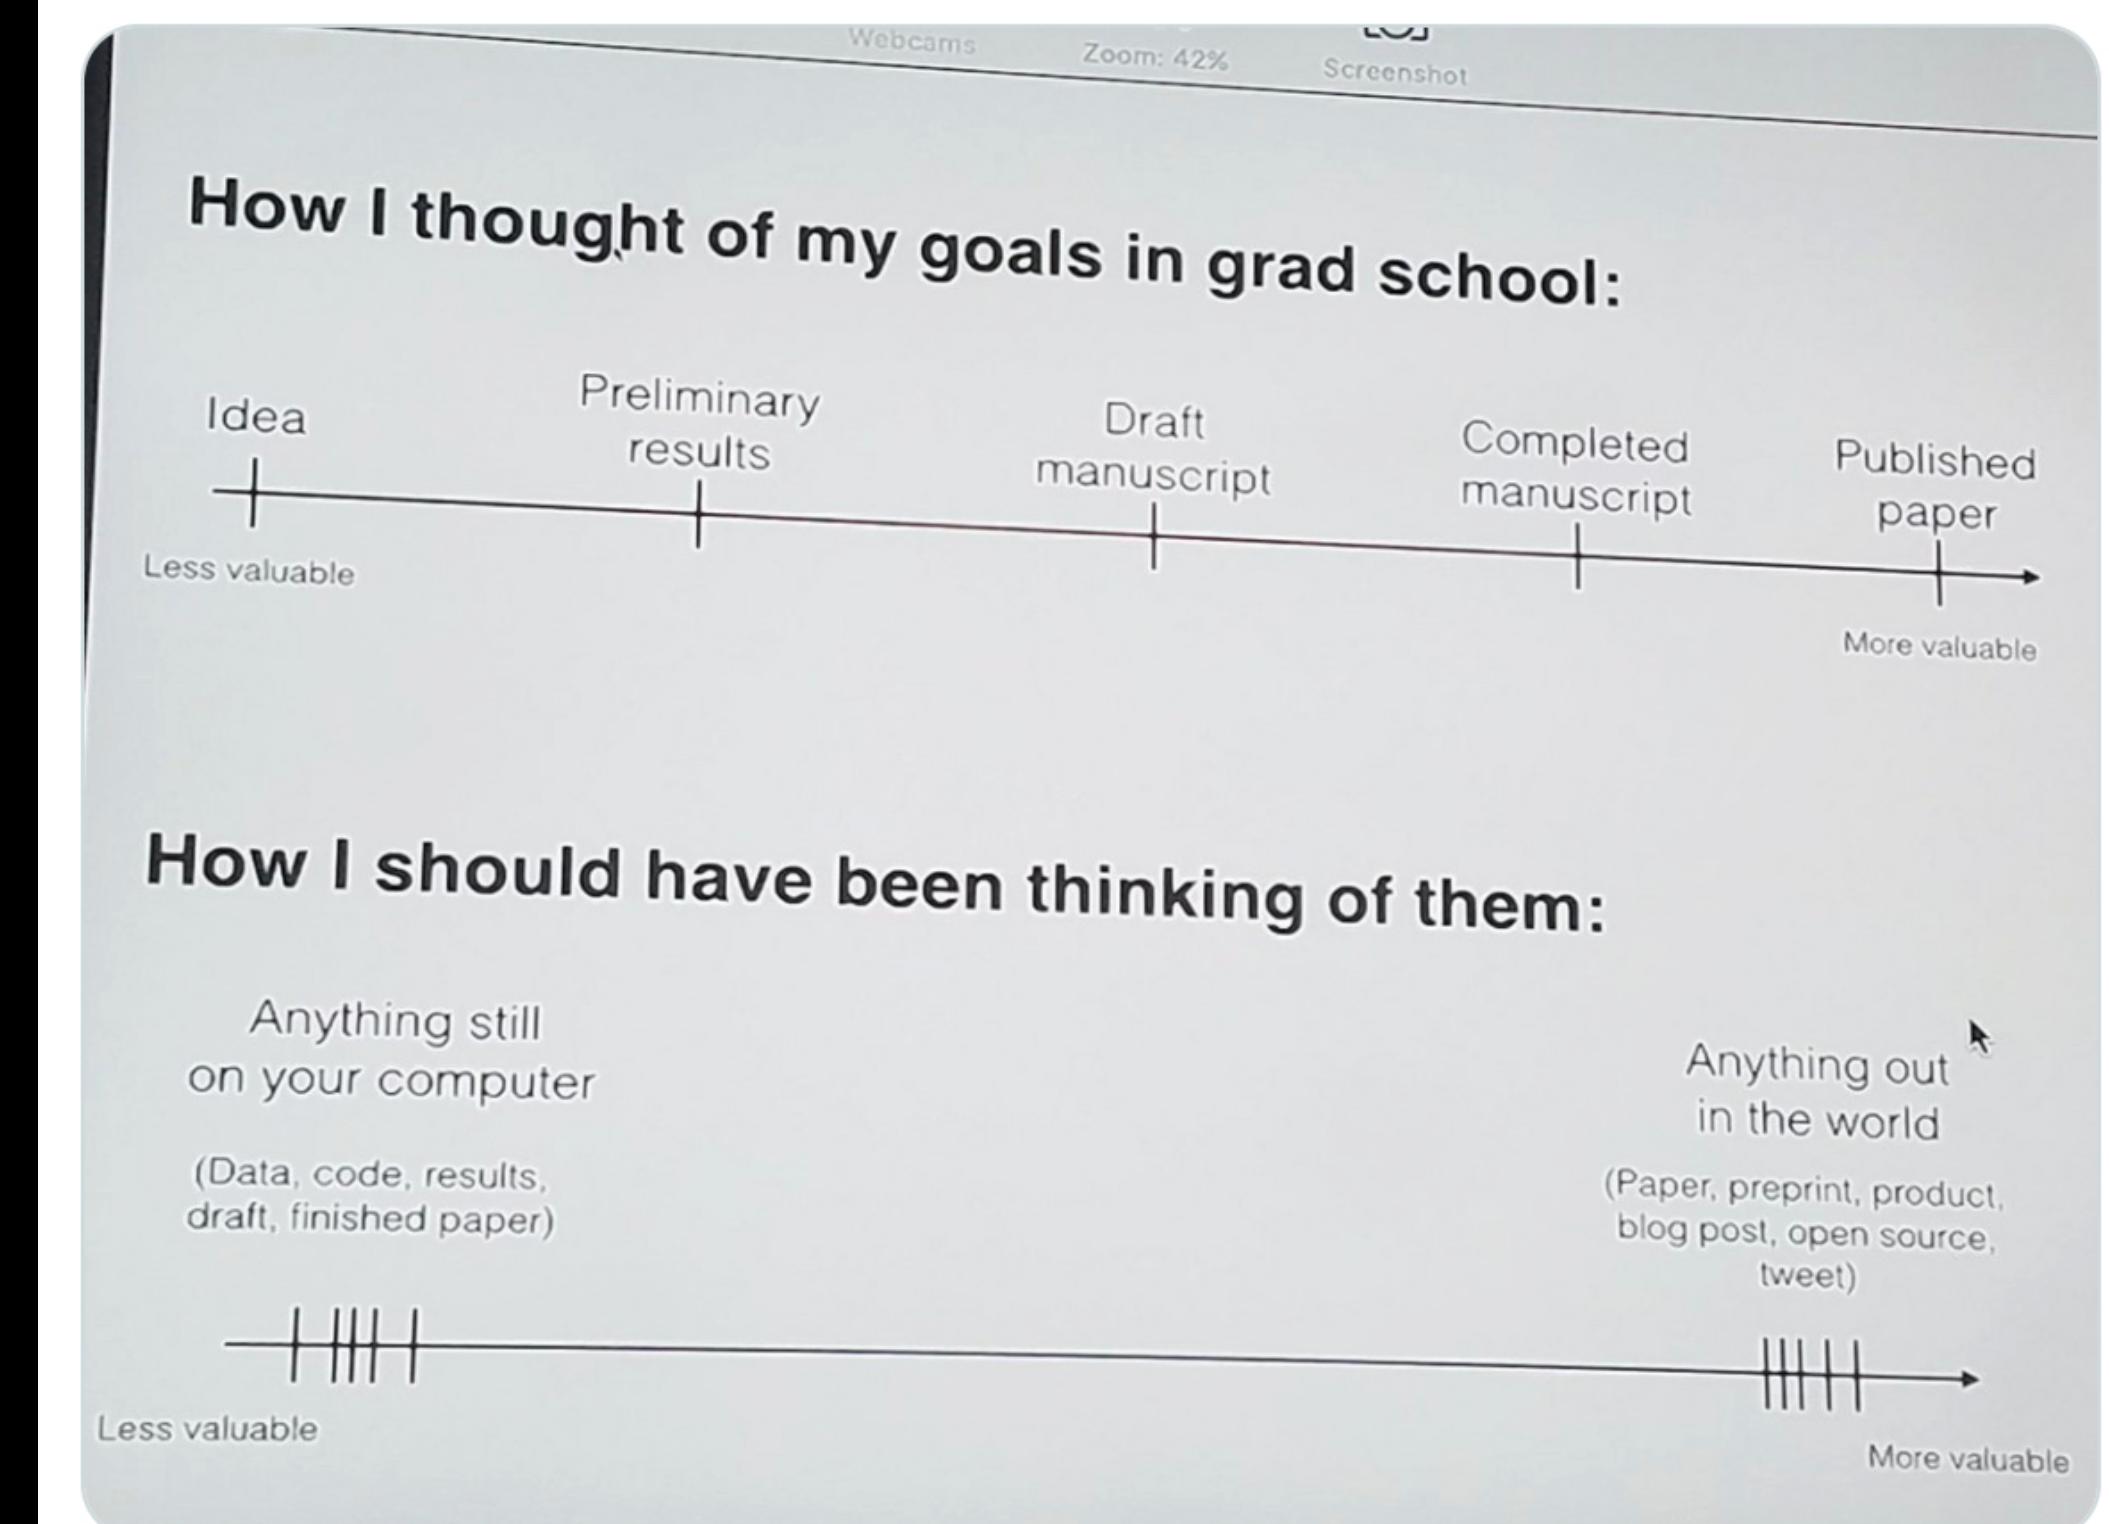

<http://varianceexplained.org/r/start-blog/>
